

Full-stack engineer with deep roots in frontend and a genuine comfort across the stack — from React Native and GraphQL to NestJS microservices, Auth0 ecosystems, and Terraform deployments. **Three tech lead roles at Hinge Health**, shipping production systems across mobile, web, and backend. Wields AI tooling (Claude, Cursor) not as a shortcut but as a **force multiplier** — for prototyping, for documentation, for shipping faster without cutting corners. Background spans architecture, urban design, enterprise support, UX, and software — the common thread is entering complex systems and making them work better for the people inside them. Known to attempt a sense of humor.

STACK

- Frontend
- React, React Native, TypeScript, D3.js, Jotai, SSE, GraphQL
- Backend
- Node.js, NestJS, GraphQL, REST, Python, Ruby on Rails (familiar)
- Infra & Ops
- Auth0, Terraform, Docker, Kafka, Redis, Datadog, Sentry, SumoLogic
- AI Tooling
- Claude, Cursor, MCP integrations, LLM-assisted prototyping & docs
- Also
- Arduino / C++, 3D printing, drones (WIP), data viz

HOW I WORK

- Tech lead who documents, not just delivers
- Teaches the system, not just the solution
- Comfortable being the only one who doesn't know yet
- Lifts the team up as a side effect of doing good work
- AI-native without being AI-dependent
- Fast ramp · Low ego · High ownership

EDUCATION

- M.Sc. Urbanism
- TU Delft, Netherlands · 2011
- B.Arch
- Sir J.J. College of Architecture, Mumbai · 2006
- Continuing Ed
- UC Berkeley Ext. · Udacity DSA · General Assembly UX

EXPERIENCE

- Senior Software Engineer · Hinge Health
- Aug 2021 – Present · promoted SE II → Senior
- React · React Native · NestJS · GraphQL · Auth0 · Terraform · Kafka · Redis · Datadog · Ruby
- Member Referral System
- TECH LEAD
- Architected and shipped a full referral system overhaul in **3 months** — new NestJS microservice (Referral Service), React Native frontend refactor with strict separation of concerns, and a **CMS-driven UI architecture** that decouples content, copy, and layout from app release cycles. Wired up the RN app, a content-writing microservice, the new Referral Service, and the BFF layer. Used Cursor + Claude to rapidly prototype the architecture that got leadership buy-in.
- Auth0 Token Refresh
- TECH LEAD
- Led implementation of **token refresh mechanisms** post-Auth0 migration across web and React Native apps. Authored technical design for multi-client MFA architecture. Work spanned ~10 services, 3 apps, and the legacy Ruby on Rails monolith. Authored comprehensive Auth0 + remit handover docs used across pods to prevent integration issues.
- CareHub Workflow Queue
- TECH LEAD
- Built the real-time workflow queue powering CareHub — a live, SSE-driven task feed for care practitioners with **play/pause controls and scroll-like navigation**. Introduced Jotai for state management. Implemented pagination and live queue updates. Shipped the frontend experience that practitioners use daily to manage their member care workload.

- Developer · Riffyn
- Oct 2019 – Aug 2021
- Built dynamic data interfaces for scientific experiment tracking. **React, TypeScript, D3.js, Meteor.js.**
- Frontend Developer · Chase (JPMC)
- Feb 2019 – Aug 2019
- Customer-facing features on chase.com. Led team to 3rd place in internal hackathon for collaborative code editing tool. **JS, BlueJS MVC.**
- Content Engineer · Flexera
- Jan 2018 – Jan 2019
- Automated ingestion and validation of software licenses in compliance pipelines. **JS, jQuery, D3, SQL, Java.**
- Support + QA Engineer → Solutions Engineer · Palamida (Flexera)
- 2014 – 2017
- Enterprise support for Adobe, Microsoft and others on complex code-scanning pipelines. Built internal API usage dashboards. Introduced Git + Docker to the support org. **Node.js, MySQL, D3, Groovy.**
- UX Engineer & Designer · Karuna VR / Resonate.ai
- 2017 – 2018
- Designed and developed UI and menus in Unity for a VR-based pain therapy app using virtual embodiment. Also designed interaction systems for an AI-driven narrative tool. Learned how humans adopt unfamiliar technology — still applies daily.
- Architect & Urban Designer · Global Firms (US, EU, India) + Visiting Lecturer
- 2006 – 2012
- Large-scale projects across 3 continents. Taught design fundamentals at Sir J.J. College of Architecture. Core skill: translating between people who see the world completely differently.
